PhotoContest Pro provides two methods for submitting pictures to contests.		
Method 1 is the preferred method as it provides more features and a better experience. Method 1 requires the Microsoft Silverlight plugin (similar to Adobe Flash) which will install the first time you use it. Silverlight		
works on the latest version of all major browsers and it works on PCs and MACs.		
use Method 2.		
Method 2 is a direct upload and works on nearly all combinations of browsers and operating systems.		
Method 2 has fewer features than Method 1 and should only be used if you can't get Method 1 working.		
	1

4. The next screen will show a list of contests available for submission on the left side of the browser window.

5. The right-hand side of the window about in the middle of the screen you will see the "New Picture (or drop here)" button. Click on that button to select your picture for upload. The max size available is 2000 pixels on the longest side. (we will try that size for now and see how it goes – if anything changes you will be notified. If pictures are not sized correctly, you will receive an error and the picture will not upload)

6. After selecting the picture to upload you will see a message about the picture not being saved until you enter a title.

	x
Your picture is not submitted until you fill in the title and click the "Save Picture and Info" button.	
ОК	

7. Go to the Title field in the right-hand side frame and type in your image title and then click the button in the center that says "Save Picture and Info".

8. You will see your image appear in the listed of submitted images under contest notes. You also see other contest details in that area.
